

ALEENA JOMY

Python Developer | Django | REST APIs | Full-Stack Web Development

📞 +91 8547139184 ✉ aleenajomy4@gmail.com 🔗 linkedin.com/in/aleena-jomy 🐙 github.com/Aleenajomy 📍 Kannur, Kerala

Summary

Computer Science graduate with hands-on experience developing **web applications**, **REST APIs**, and **database-driven solutions** using **Python**, **Django**, **JavaScript**, **React**, and **PostgreSQL**. Built **full-stack applications** involving **authentication**, **data management**, **automation**, and **analytics** while applying **software development best practices**. Familiar with **API integration**, **database optimization**, **Git**, **GitHub**, and modern development tools. Eager to contribute to software engineering teams while continuously learning emerging technologies and industry standards.

Experience

Python Django Developer Intern

Nov 2025 – Jan 2026

Zecser Business LLP (Remote)

- Built and maintained **15+ REST API endpoints** using Django REST Framework for authentication, user management, and workflow automation, supporting ~500 daily requests.
- Reduced PostgreSQL query execution time by **25%** through SQL optimization, indexing strategies, and query plan analysis on a database of **10,000+ records**.
- Accelerated frontend-backend integration by **30%** by collaborating with React developers to define API contracts and mock data schemas.
- Validated **100%** of API endpoints using Postman test suites; managed version history across 3+ Git branches.

Projects

MoneySuivi – Personal Finance Management Platform | React, Node.js, Express.js, PostgreSQL, Prisma

May 2026

- Developed a full-stack personal finance platform supporting expense tracking, budget management, EMI monitoring, asset tracking, and borrow/lend ledger management.
- Built **20+ REST API endpoints** using Express.js and PostgreSQL for transactions, budgets, loans, notifications, authentication, and financial analytics.
- Implemented secure JWT authentication, recurring transaction automation, PWA support, and web push notifications for budget alerts and payment reminders.
- Designed interactive analytics dashboards with spending trends, category-wise insights, net-worth calculations, and loan repayment tracking.
- **Live:** smartexpencetracker-frontend.onrender.com

Finder – Hyperlocal Worker Discovery Platform | Django, DRF, React, PostgreSQL

Mar 2026 - Apr 2026

- Contributed to a **full-stack geolocation-based platform** enabling discovery of nearby service providers.
- Developed **10+ REST API endpoints** for search, filtering, and efficient data retrieval using Django REST Framework.
- Implemented **pincode-level filtering logic** to deliver accurate location-based results across multiple areas.
- Optimized **PostgreSQL database** managing **50+ records** for improved query performance.
- Deployed application using **Render and Vercel** with seamless React integration.
- **Live:** finder-swart.vercel.app

ResumeMaker – AI ATS Resume Optimizer | React, TypeScript, Django, PostgreSQL, LaTeX

Feb 2026 - Mar 2026

- Designed an AI-powered application that produces job-specific, ATS-optimized resumes from user profiles and job descriptions, reducing manual editing time by **~70%**.
- Established a LaTeX-driven PDF generation pipeline achieving **100% parse accuracy** across 5 tested ATS tools; architected **8 REST APIs** supporting profile storage, JWT authentication, and asynchronous document generation.
- Developed an ATS keyword analysis module that increased average resume-job match scores by **40 percentage points** during internal evaluation.
- **GitHub:** <https://github.com/Aleenajomy/ResumeMaker.git>

Skills

- **Languages:** Python, JavaScript, TypeScript, Java, C
- **Backend:** Django, Django REST Framework, Node.js (Basic), Express.js (Basic), REST API Development.
- **Frontend:** HTML5, CSS3, JavaScript, React.js (Basic), Bootstrap, Tailwind CSS (Basic).
- **Databases:** PostgreSQL, MySQL, MongoDB (Basic), Query Optimization.
- **Authentication:** JWT Authentication, Role-Based Access Control (RBAC).
- **Tools:** Git, GitHub, Postman, Linux.
- **Concepts:** REST APIs, MVC Architecture, Data Structures, Object-Oriented Programming (OOP), SDLC, Agile Methodologies.
- **AI Tools:** ChatGPT, Antigravity, Codex.
- **Learning:** Docker (Beginner), CI/CD (Basic)
- **Human Languages:** English (Fluent), Malayalam (Native)

Education

B.Tech in Computer Science & Engineering

Government Engineering College, Wayanad

Sep 2022 – Apr 2025

CGPA: 6.57 / 10

Diploma in Computer Engineering

Government Residential Women's Polytechnic College, Payyannur

Aug 2016 – Apr 2019

CGPA: 6.79 / 10
